

WFI Signs Strategic Agreement With Comtest Wireless to Provide Wireless Network Services in Italy and Surrounding Countries

Agreement Drives Geographic Expansion, Broadens Services

SAN DIEGO, Aug 10, 2005 /PRNewswire-FirstCall via COMTEX/ -- Wireless Facilities, Inc. (WFI) (Nasdaq: WFII), a global leader in the design, deployment, and management of wireless communication networks, technology networks and security systems, announced today an agreement with Comtest Wireless Srl (CW) to provide wireless network and engineering services for various clients throughout Italy and surrounding countries. The agreement has an initial term period of one year and includes mutual cooperation in providing end-to-end network and telecom consulting services.

Under the terms of the agreement, WFI will provide project management, including RF engineering and optimization, deployment and installation and commissioning services for multiple projects. CW will provide a research and development team of engineers and state of the art test and measurement equipment. Parties will jointly participate on general marketing activities. Further terms of the agreement were not disclosed.

"We chose Comtest as we share a commitment of providing the most reliable and highest quality technical engineering services to our customers," said Igor Leprince, Managing Director of WFI EMEA. "This strategic agreement strengthens our capabilities and services throughout the European community. We are pleased to enter into this strategic relationship with Comtest Wireless as a key partner to deliver next-generation networks to an expanded geographic region."

"With more than 10 years of experience in RF engineering and wireless networking services, WFI brings to this relationship extensive expertise," said Pietro Comerro, General Manager for Comtest Wireless. "WFI has a firm grasp on wireless network and engineering requirements for its customers, particularly as 3G becomes more widely deployed. We are proud to have this opportunity for our companies to work together, and look forward to providing a breadth of engineering and technical services to our customers."

WFI EMEA has been involved in more than 30 UMTS projects and 20 GSM/GPRS and CDMA projects for major operators and vendors in more than 28 countries across EMEA, with major operations in UK, Belgium, France, Germany, Sweden, Netherlands, Turkey, Luxembourg, Ireland, Spain, Israel and Portugal. WFI EMEA offices are located in London, Sweden, China and India.

About Comtest Wireless

Headquartered in Torino, with a branch office in Rome, Italy, CW has extensive international experience in the Radio engineering consultancy including engineering services and the sales, development, and training of test and measurement equipment used by network operators and equipment manufacturers for the optimization, testing and design of wireless networks. CW has led the way in both wireless and wireline network test equipment for current and next generation communication networks. CW's services division supplied planning and optimization services, benchmarking, and network services to operators and vendors in Italy and abroad. About WFI

Headquartered in San Diego, CA, WFI is an independent provider of systems engineering, network services and technical outsourcing for the world's largest wireless carriers, enterprise customers and for government agencies. The company provides the design, deployment, integration, and the overall management of wired and wireless networks which deliver voice and data communication, and which support advanced security systems. WFI has performed work in over 100 countries since its founding in 1994. News and information are available at www.wfinet.com. (code: WFI-mb)

Notice Regarding Forward-Looking Statements

This news release contains certain forward-looking statements including, without limitation, expressed or implied statements concerning the Company's expectations regarding future financial performance and market developments that involve risks and uncertainties. Such statements are only predictions, and the Company's actual results may differ materially. Factors that may cause the Company's results to differ include, but are not limited to: changes in the scope or timing of the Company's projects; slowdowns in telecommunications infrastructure spending in the United States and globally, which could delay network

deployment and reduce demand for the Company's services; the timing, rescheduling or cancellation of significant customer contracts and agreements, or consolidation by or the loss of key customers; the adoption rate of new wireless data services; financial constraints on our customers that could cause us to write off accounts receivable or terminate contracts; failure to successfully consummate acquisitions or integrate acquired operations; changes in the Company's effective income tax rate; the rate of adoption of telecom outsourcing by network carriers and equipment suppliers; the rate of growth of adoption of WLAN and wireless security systems by enterprises; and competition in the marketplace which could reduce revenues and profit margins. The Company undertakes no obligation to update any forward-looking statements. These and other risk factors are more fully discussed in the Company's Annual Report on Form 10-K filed on March 31, 2005 and in other filings made with the Securities and Exchange Commission.
