

Gregory Meacham Joins WFI as Vice President, Business Development, Public Safety

Company Increases Focus on Public Safety and Land Mobile Radio Opportunities

SAN DIEGO, Sept 16, 2005 /PRNewswire-FirstCall via COMTEX/ -- Wireless Facilities, Inc. (WFI) (Nasdaq: WFII), a global leader in the design, deployment, and management of wireless communication networks, technology networks and security systems, announced today that Gregory Meacham has joined the Company in the role of vice president of business development for public safety. Mr. Meacham is a senior-level executive with more than 25 years of experience with various aspects of public safety, security, and law enforcement. Most recently he served as the Vice President of Federal Programs and Homeland Security at Nextel Communications. Meacham will be based in WFI's Reston, VA office.

In his role as vice president of business development, Meacham will focus specifically on leveraging WFI's capabilities in radio frequency (RF), Internet protocol (IP) network engineering, Land Mobile Radio (LMR) engineering, and communication network design and deployment to capture opportunities related to the public safety community.

"The public safety market, which includes helping to facilitate the interoperability of communications systems between law enforcement and first responders, is a key area of focus for WFI," commented Eric DeMarco, President and CEO of WFI. "As network and communications specialists, our experience with traditional cellular systems, land-mobile radio systems, 802.11 systems and communications interoperability should enable us to capture a share of the growing market for public safety related communications services. We are fortunate to have someone of Greg's stature join the WFI team. He is extremely knowledgeable in many aspects of Public Safety and he is very well- connected to the government institutions that we need to work directly with to make immediate inroads in this area."

At Nextel, Meacham was responsible for business development and enhancing the delivery of services and products to meet the needs of the federal market and public safety community. In this role, Meacham created an emergency response team to provide rapid deployment capability to support public safety in times of crisis by increasing wireless capacity, providing coverage, and enhancing coordination by implementing a common communications platform. Previously, Meacham was Chief, Technical Programs Section, Federal Bureau of Investigation (FBI). In this position he was responsible for managing technical programs to further the FBI strategic plan through the design, implementation, and management of an integrated digital wireless communications system.

Meacham received a Master of Public Administration degree from the University of Southern California and a Bachelor's degree from the University of Maryland. Additionally, Meacham is a Certified Fraud Examiner and a Certified Public Accountant. Meacham holds membership in various industry organizations, including the Association of Certified Fraud Examiners, the International Association of Chiefs of Police, and he was a member of the Executive Committee, Public Safety Wireless Network Program.

About WFI

Headquartered in San Diego, CA, WFI is an independent provider of systems engineering, network services and technical outsourcing for the world's largest wireless carriers, enterprise customers and for government agencies. The company provides the design, deployment, integration, and the overall management of wired and wireless networks which deliver voice and data communication, and which support advanced security systems. WFI has performed work in over 100 countries since its founding in 1994. News and information are available at www.wfinet.com. (code: WFI-mb)

Notice Regarding Forward-Looking Statements

This news release contains certain forward-looking statements including, without limitation, expressed or implied statements concerning the Company's expectations regarding future financial performance and market developments that involve risks and uncertainties. Such statements are only predictions, and the Company's actual results may differ materially. Factors that may cause the Company's results to differ include, but are not limited to: changes in the scope or timing of the Company's projects; slowdowns in tele- communications infrastructure spending in the United States and globally, which could delay network deployment and reduce demand for the Company's services; the timing, rescheduling or cancellation of significant customer contracts and agreements, or consolidation by or the loss of key customers; the adoption rate of new wireless data services; financial constraints on our customers that could cause us to write off accounts receivable or terminate contracts; failure to successfully consummate acquisitions or integrate acquired operations; changes in the Company's effective income tax rate; the rate of adoption of telecom outsourcing by network carriers and equipment suppliers; the rate of growth of

adoption of WLAN and wireless security systems by enterprises; and competition in the marketplace which could reduce revenues and profit margins. The Company undertakes no obligation to update any forward-looking statements. These and other risk factors are more fully discussed in the Company's Annual Report on Form 10-K filed on March 31, 2005 and in other filings made with the Securities and Exchange Commission.
