

## **Kratos Successfully Completes Engine Testing for an Affordable and High Performance Turbine Engine for Future Expendable Cruise Missiles and Attritable UAVs**

June 28, 2021

SAN DIEGO, June 28, 2021 (GLOBE NEWSWIRE) -- Kratos Defense & Security Solutions, Inc. (Nasdaq: KTOS) announced today that Kratos Turbine Technologies (KTT) Division has successfully completed a core engine test campaign under KTT's Advanced Turbine Technologies for Affordable Mission (ATTAM) contract. This turbine engine development program is managed by the Turbine Engine Division of the Air Force Research Laboratory (AFRL/RQT). Testing of the engine core supports the development of small, affordable, high-performance jet engines for cruise missiles and Unmanned Aerial Vehicles (UAVs). During the test campaign, KTT successfully demonstrated key performance and operability targets of the core engine.

Stacey Rock, President of Kratos Turbine Technologies Division, said, "The successful core engine test demonstrates the great working relationship that KTT has with the AFRL Turbine Engine Division, and the desire from both parties to increase capability and lower cost of expendable turbine engine propulsion. We look forward to continuing to support AFRL in the development of transformative and affordable turbine engine technologies. All of Kratos is focused on supporting the United States warfighter and industrial base, including making significant investments in the development and production of next generation engines and supporting STEM opportunities in the USA."
