

Kratos Unmanned Systems Division Self-Driving Truck Leader Follower Platoon Fleet to Be Deployed in Ohio and Indiana

March 12, 2024 at 8:00 AM EDT

SAN DIEGO, March 12, 2024 (GLOBE NEWSWIRE) -- Kratos Defense & Security Solutions, Inc. (Nasdaq: KTOS), a Technology Company in the Defense, National Security and Global Markets, announced today that it will be deploying self-driving Class 8 tractor/trailers in a Leader Follower Platoon hauling customer freight shipments along revenue generating routes in Ohio and Indiana.

The Kratos Unmanned Systems Division is under contract to deploy its self-driving platooning technology later this year between Ohio and Indiana along a major trucking corridor. Teamed with EASE Logistics, a third-party logistics (3PL) company that provides services to automotive, aerospace, food & beverage, and major manufacturing companies, the Leader Follower Platoon will be a first-of-its kind deployment to address driver shortage impacts by enabling business continuity when qualified drivers are unavailable.

The leader and follower trucks were provided by EASE Logistics who will also provide a highly qualified driver for the leader truck and a Safety Rider onboard the self-driving follower truck who can take over manual driving control at any time. The trucks were retrofitted by Kratos with self-driving technology to enable the Leader Follower Platooning operation. The system will be integrated as part of normal 24/7 supply chain activity hauling freight in 53-foot dry van trailers on short-haul routes for round-trip totals of 450 to 500 miles.

Maynard Factor, VP of Business Development for the Kratos Unmanned Systems Division, said, "Kratos is excited to team with EASE Logistics to support this landmark Leader Follower Platoon deployment establishing the baseline for how driverless technology can be deployed in a game-changing configuration. The Leader Follower Platoon is a great adaptation of driverless vehicle technology that maintains driver jobs by pairing a human-driven truck with a self-driving follower truck to maintain or increase haul capacity depending on the available driver pool. Supply chain security is national security and using the Kratos Leader Follower Platoon is a solution that can strengthen a company's ability to maintain jobs and secure supply chain activity as a win-win."

The Leader Follower Platoon consists of a human-driven Leader truck transmitting navigation and command data to a Follower truck enabled with self-driving technology. The technology enabling the deployment was adapted from systems Kratos originally developed for the U.S. Department of Defense leveraging proven architectures, advanced cyber security, and robust environmental hardening. The Leader Follower Platoon will be deployed with drivers from EASE Logistics who have completed an extensive and comprehensive training program conducted by Kratos.

Peter Coratola, Jr., President & CEO of EASE Logistics, said, "EASE is honored to serve as Kratos' fleet partner for this groundbreaking deployment in partnership. We recognize this opportunity as an important step toward shoring up the supply chain, which is a critical component of national security. We look forward to collecting and providing data that will enable this crucial innovation to be deployed across the U.S."

About Kratos Defense & Security Solutions

Kratos Defense & Security Solutions, Inc. (NASDAQ: KTOS) is a technology, products, system and software company addressing the defense, national security, and commercial markets. Kratos makes true internally funded research, development, capital and other investments, to rapidly develop, produce and field solutions that address our customers' mission critical needs and requirements. At Kratos, affordability is a technology, and we seek to utilize proven, leading edge approaches and technology, not unproven bleeding edge approaches or technology, with Kratos' approach designed to reduce cost, schedule and risk, enabling us to be first to market with cost effective solutions. We believe that Kratos is known as an

innovative disruptive change agent in the industry, a company that is an expert in designing products and systems up front for successful rapid, large quantity, low cost future manufacturing which is a value add competitive differentiator for our large traditional prime system integrator partners and also to our government and commercial customers. Kratos intends to pursue program and contract opportunities as the prime or lead contractor when we believe that our probability of win (PWin) is high and any investment required by Kratos is within our capital resource comfort level. We intend to partner and team with a large, traditional system integrator when our assessment of PWin is greater or required investment is beyond Kratos' comfort level. Kratos' primary business areas include virtualized ground systems for satellites and space vehicles including software for command & control (C2) and telemetry, tracking and control (TT&C), jet powered unmanned aerial drone systems, hypersonic vehicles and rocket systems, propulsion systems for drones, missiles, loitering munitions, supersonic systems, space craft and launch systems, C5ISR and microwave electronic products for missile, radar, missile defense, space, satellite, counter UAS, directed energy, communication and other systems, and virtual & augmented reality training systems for the warfighter.
