

Kratos Wins \$20 Million Contract to Deliver Mobile SATCOM Gateways for Resilient Defense Network

September 1, 2026

SAN DIEGO, Sept. 01, 2026 (GLOBE NEWSWIRE) -- Kratos Defense & Security Solutions, Inc. (Nasdaq: KTOS), a technology company in defense, national security and global markets, announced today that it has been awarded a contract valued at more than \$20 million to deliver mobile satellite communication (SATCOM) gateways for a defense customer in Asia.

Around the world, fixed communications infrastructure is becoming increasingly vulnerable to emerging threats. Recent conflicts and contested environments have shown that stationary SATCOM facilities can be easily targeted or disrupted, and modern operations often face denied spectrum and damaged public networks. These conditions highlight a critical need for defense organizations to deploy mobile SATCOM gateways that can maintain secure, reliable connectivity when traditional systems fail. With this capability, warfighters gain access to real-time situational awareness and mission-critical data where and when it matters most.

As part of the system, Kratos will deliver its rapid-deployable, truck-mounted Trifold[®] transportable antennas that can be deployed without any special tools and ready to discretely transport at a moment's notice. These Trifold[®] antennas are integrated into the mobile SATCOM hub that provides high-throughput, dependable communications in dynamic field environments.

The turnkey system also incorporates a shelter containing baseband platforms and advanced monitoring software, including Kratos' Compass[®] product for complete monitor-and-control (M&C) of mission-critical networks, and Kratos' Monics[®] product for spectrum monitoring and interference detection, forming a cohesive and resilient mobile gateway tailored for defense operations.

This award strengthens Kratos' position as a leader in transportable antennas and ground system technologies. The program also expands Kratos' presence in the Asia-Pacific region and reinforces the company's role as a trusted provider of advanced, resilient communications systems for defense applications worldwide.

"This capability is ultimately about giving operators on the ground what they need most: dependable communications they can count on in the middle of fast-moving missions," said **John Chay, Vice President of Business Development in Asia, at Kratos**. "When fixed infrastructure is compromised, this mobile gateway lets warfighters stay connected, aware, and supported wherever the mission takes them."

About Kratos Defense & Security Solutions

Kratos Defense & Security Solutions, Inc. (NASDAQ: KTOS) is a technology, products, system and software company addressing defense, national security, and commercial markets. Kratos makes true internally funded research, development, capital and other investments, to rapidly develop, produce and field solutions that address our customers' mission critical needs and requirements. At Kratos, affordability is a technology, and we seek to utilize proven, leading-edge approaches and technology, not unproven bleeding edge approaches or technology, with Kratos' approach designed to reduce cost, schedule and risk, enabling us to be first to market with cost effective solutions. We believe that Kratos is known as an innovative disruptive change agent in the industry, a company that is an expert in designing products and systems up front for successful rapid, large quantity, low-cost future manufacturing which is a value-add competitive differentiator for our large traditional prime system integrator partners and also to our government and commercial customers. Kratos intends to pursue program and contract opportunities as the prime or lead contractor when we believe that our probability of win (PWin) is high and any investment required by Kratos is within our capital resource comfort level. We intend to partner and team with a large, traditional system integrator when our assessment of PWin is greater or required investment is beyond Kratos' comfort level. Kratos' primary business areas include virtualized ground systems for satellites and space vehicles including software for command & control and telemetry, tracking and control, jet powered unmanned aerial drone systems, hypersonic vehicles and rocket systems, propulsion systems for drones, missiles, loitering munitions, supersonic systems, space craft and launch systems, C5ISR and microwave electronic products for missile, radar, missile defense, space, satellite, counter unmanned aircraft systems, directed energy, communication and other systems, and virtual & augmented reality training systems for the warfighter.
