Kratos Completes SRR Supporting U.S.S.F. SSC's RMWT Ground Management & Integration Effort

November 11, 2026

SRR supports continued systems engineering and integration activities

SAN DIEGO, Nov. 11, 2026 (GLOBE NEWSWIRE) -- Kratos Defense & Security Solutions, Inc. (Nasdaq: KTOS), a technology company in the defense, national security and global markets, today announced it has successfully completed the System Requirements Review (SRR) supporting the U.S. Space Force's (USSF) Space Systems Command (SSC) Ground Management and Integration (GMI) effort for the Resilient Missile Warning and Tracking (MWT) program.

The SRR is a technical milestone supporting continued requirements development, systems engineering, and integration planning for the GMI effort. Kratos completed the SRR within the planned review period.

Kratos used advanced digital engineering and model-based systems engineering (MBSE) tools to support the review process, including requirements development and system-integration planning. The work supports an open, interoperable approach intended to enable integration across multiple space and ground segments.

The GMI effort supports development of resilient, integrated ground architecture for the Resilient MWT program. Kratos is integrating their unique ground system with the SSC Future Operationally Resilient Ground Evolution (FORGE) platform to support evolving constellation and mission requirements.

The SRR supported continued systems engineering and integration activities for the GMI effort, ensuring that stronger missile warning and tracking capabilities will be delivered to the Joint warfighter.

About Kratos Defense & Security Solutions
Kratos Defense & Security Solutions, Inc. (NASDAQ: KTOS) is a technology, products, system and software company addressing the defense, national security, and commercial markets. Kratos makes true internally funded research, development, capital and other investments, to rapidly develop, produce and field solutions that address our customers' mission critical needs and requirements. At Kratos, affordability is a technology, and we seek to utilize proven, leading-edge approaches and technology, not unproven bleeding edge approaches or technology, with Kratos' approach designed to reduce cost, schedule and risk, enabling us to be first to market with cost effective solutions. We believe that Kratos is known as an innovative disruptive change agent in the industry, a company that is an expert in designing products and systems up front for successful rapid, large quantity, low-cost future manufacturing which is a value-add competitive differentiator for our large traditional prime system integrator partners and also to our government and commercial customers. Kratos intends to pursue program and contract opportunities as the prime or lead contractor when we believe that our probability of win (PWin) is high and any investment required by Kratos is within our capital resource comfort level. We intend to partner and team with a large, traditional system integrator when our assessment of PWin is greater or required investment is beyond Kratos' comfort level. Kratos' primary business areas include virtualized ground systems for satellites and space vehicles including software for command & control (C2) and telemetry, tracking and control (TT&C), jet powered unmanned aerial drone systems, hypersonic vehicles and rocket systems, propulsion systems for drones, missiles, loitering munitions, supersonic systems, space craft and launch systems, C5ISR and microwave electronic products for missile, radar, missile defense, space, satellite, counter UAS, directed energy, communication and other systems, and virtual & augmented reality training systems for the warfighter.
