

U.S. Defense and Intelligence Agencies Expand Their Reliance on NeuralStar Situational Awareness and Cyber Security Product From Kratos With \$1.1 Million in New Sales

Kratos Cyber Security, Situational Awareness and Cyber Security Practice Nears \$100 Million in Annual Revenues

SAN DIEGO, Oct. 3, 2011 (GLOBE NEWSWIRE) -- [Kratos Defense & Security Solutions, Inc.](http://www.kratosdefense.com) (Nasdaq:KTOS), a leading National Security Solutions provider, today announced sales valued at a total of \$1.1 million by four major U.S. Government agencies for NeuralStar®, its flagship network management and situational awareness software product. The names of the agencies, all of which are aligned with critical defense and intelligence operations, were not disclosed due to customer-related and other sensitivities.

NeuralStar monitors, aggregates and integrates mission-critical network availability, cyber security and compliance management data from heterogeneous technologies to create flexible, dynamic dashboards for enhanced management and complete situational awareness. This allows NeuralStar to provide a Common Operational Picture (COP) for all levels of command across large distributed network and field operations, especially those that rely upon a variety of communications, information and security technologies. For example, two of the agencies purchasing NeuralStar rely heavily upon analog-based satellite communications. NeuralStar uniquely allows them to easily integrate management of these systems into their overall communications command and control picture for a unified 360 degree view.

"All of these agencies function on the frontiers of communications and cyber security operations," said Phil Carrai, President of Kratos Technologies and Training Solutions. "They include some of the world's largest global networks as well as smaller, highly specialized and in-the-field operations. It is gratifying to see this endorsement of the NeuralStar platform as the standard for highly-secure network management and situational awareness."

About Kratos Defense & Security Solutions

Kratos Defense & Security Solutions, Inc. (Nasdaq:KTOS) is a specialized National Security technology business providing mission critical products, services and solutions for United States National Security priorities. Kratos' core capabilities are sophisticated engineering, manufacturing and system integration offerings for National Security platforms and programs. Kratos' areas of expertise include Command, Control, Communications, Computing, Combat Systems, Intelligence, Surveillance and Reconnaissance (C5ISR), satellite communication systems, unmanned systems, cyber warfare, cyber security, information assurance, critical infrastructure security and weapons systems sustainment. Kratos has primarily an engineering and technical oriented work force of approximately 3,900, many of which hold an active National Security clearance, including Secret, Top Secret and higher. The vast majority of Kratos' work is performed on a military base, in a secure facility or at a critical infrastructure location. Kratos' primary end customers are United States Federal Government agencies, including the Department of Defense, classified agencies, intelligence agencies and Homeland Security related agencies. News and information are available at www.KratosDefense.com.
