

WFI Awarded Subcontract for Consolidated Acquisition and Professional Services (CAPS) Valued At Approximately \$10 Million

Contract Extends WFI's Capabilities Into Aeronautical Systems Center For Air Force

SAN DIEGO, June 19, 2006 /PRNewswire-FirstCall via COMTEX News Network/ -- WFI (Nasdaq: WFII), a global leader in the design, deployment, and management of wireless communication networks, information technology solutions and security systems, announced today it has been awarded the Consolidated Acquisition and Professional Services (CAPS) subcontract as part of The CENTECH GROUP, Inc.'s Small Business Team. CAPS will provide Advisory and Assistance Services for the Aeronautical Systems Center, located at Wright-Patterson Air Force Base (WPAAFB), in Ohio. WFI estimates the award to have a total potential value of approximately \$10 million over a five-year period of performance, assuming all option periods are exercised.

Under the terms of this award, WFI will perform tasks in key functional areas to support the mission of Wright-Patterson Air Force Base, including acquisition logistics, financial management, cost estimating and schedule analysis. WFI will provide subject matter experts to support key tasks in the contract, including engineering services, acquisition management, test and evaluation, and configuration and data management.

"This is an \$850 million dollar contract, of which WFI estimates its value to be approximately \$10 million. The award of this subcontract is another win for our Government business as we seek to broaden our services into additional military agencies with the DoD," said Eric DeMarco, President and CEO of WFI. "A very important part of our strategy is to broaden our capabilities and diversify our client base within our Government operations, and we are delighted to have been selected to serve the U.S. Air Force and DoD. Additionally, we are proud to have been selected as part of The CENTECH GROUP's Small Business team, further illustrating our growing reputation as a technical services leader in the government arena."

"Building on our strategic partnership with The CENTECH GROUP gives us the opportunity to provide advanced technology and expertise to the Air Force at Wright-Patterson, and underscores our commitment to being a valued team member in the growing area of national defense," said Robin Mickle, President of WFI Government Services, Inc.

Located at Wright-Patterson Air Force Base in Ohio, the Aeronautical Systems Center is a computational science facility supporting Department of Defense (DoD) research, development, test, and evaluation using high performance computing (HPC) research and visualization.

WFI Government Services, Inc. is a wholly-owned subsidiary of WFI, with offices and project locations throughout the United States. Areas of expertise include technical resources consulting, logistics and RFID solutions, homeland security and public safety applications and communications technology services.

About WFI

Headquartered in San Diego, CA, WFI is an independent provider of systems engineering, network services and technical outsourcing for the world's largest wireless carriers, enterprise customers and for government agencies. The company provides the design, deployment, integration, and the overall management of wired and wireless networks which deliver voice and data communication, and which support advanced security systems. WFI has performed work in over 100 countries since its founding in 1994. News and information are available at <http://www.wfinet.com>. (code: WFI-mb)

Notice Regarding Forward-Looking Statements

This news release contains certain forward-looking statements including, without limitation, expressed or implied statements concerning the Company's expectations regarding anticipated operating results for 2006, future financial performance and cash flows and market developments that involve risks and uncertainties. Such statements are only predictions, and the Company's actual results may differ materially. Factors that may cause the Company's results to differ include, but are not limited to: changes in the scope or timing of the Company's projects; changes or cutbacks in spending by the U.S. Department of Defense, which could cause delays or cancellations of key government contracts; slowdowns in telecommunications infrastructure spending in the United States and globally, which could delay network deployment and reduce demand for the Company's services; the timing, rescheduling or cancellation of significant customer contracts and agreements, or consolidation by or the loss of key customers; failure to successfully consummate acquisitions or integrate acquired operations;

the rate of adoption of telecom outsourcing by network carriers and equipment suppliers; the rate of growth of adoption of WLAN and wireless security systems by enterprises; and competition in the marketplace which could reduce revenues and profit margins. The Company undertakes no obligation to update any forward-looking statements. These and other risk factors are more fully discussed in the Company's Quarterly Report on Form 10-Q for the period ended March 31, 2006 and in other filings made with the Securities and Exchange Commission.
