

## **Wireless Facilities Announces Multi-Year Agreement With TruePosition to Support E911 Solution for U.S. Wireless Operators**

SAN DIEGO, Oct 22, 2003 /PRNewswire-FirstCall via COMTEX/ -- Wireless Facilities, Inc. (WFI) (Nasdaq: WFI), a global leader in the design, deployment and management of wireless telecommunications networks, and TruePosition, Inc., a leading provider of location-based technologies, today announced a multi-year agreement to support the installation and commissioning of TruePosition's Enhanced 911 solution initially to the major cellular and PCS operators in the USA market. This agreement will bring TruePosition's E911 services to a significant number of wireless users in the United States in an expeditious and efficient manner.

Wireless Facilities will be one of the companies supporting the TruePosition execution team in deploying TruePosition's Finder™ technology as part of its commitment to meeting the Federal Communication Commission's (FCC) Enhanced 911 (E911) Phase II mandate. The FCC requires all wireless carriers to provide designated public safety agencies with location information for 911 calls. For carriers using network-based technologies, such as TruePosition's, the FCC E911 Phase II mandate calls for wireless carriers to provide accurate data to 100 meters for 67 percent of calls and 300 meters for 95 percent of calls.

"The Wireless Facilities agreement with TruePosition solidifies our association into a long term relationship with the world wide leader in E911 and location technology for GSM and TDMA networks. We are honored to be part of this important aspect of wireless safety services for the USA and international wireless consumer," said Greg Jacobsen, WFI Executive Vice President.

"We are pleased to partner with Wireless Facilities, which is one of the companies assisting TruePosition to provide wireless location solutions to additional wireless users across the country. Wireless Facilities brings experience, breadth and the same commitment as TruePosition to providing and deploying an accurate location technology", said Michael Amarosa, Senior Vice President for Public Affairs, TruePosition, Inc.

"TruePosition continues to be a leader in the deployment of location technologies in support of the E911 mandate. Our Finder system offers the most comprehensive solution for wireless carriers across the country. The company remains committed to continuous innovation to respond to market needs in all types of environments, producing high accuracy results in urban, rural and suburban markets. TruePosition's location solution is compatible with all air-interfaces and with all existing and future wireless phones," Kent Sander, Chief Operating Office and President, TruePosition, Inc.

### **About Wireless Facilities**

As a global leader in telecommunications outsourcing, Wireless Facilities, Inc. designs, deploys, integrates and manages wireless networks and specialized security systems for some of the largest wireless telecommunication carriers, wireless equipment vendors and general contractors worldwide. Specializing in network architecture and dimensioning of mobile and high speed wireless data systems, including third generation (3G) networks, WFI provides a complete range of network services -- from business and market planning to RF engineering, fixed network engineering, IP and data engineering, site acquisition and development, installation, optimization and maintenance. WFI is headquartered in San Diego and has performed work in over 100 countries since the Company was founded in late 1994. The Company has offices in Dallas, Chicago, Seattle, Reston, Montvale, London, Gothenburg, Stockholm, Mexico City, Sao Paulo, and Beijing.
