

Kratos SAT Corporation Subsidiary Releases SAT-DSP-6000

The Satellite Industry's First 250MHz Instantaneous Bandwidth Spectrum Monitoring DSP Instrument

SAN DIEGO, March 12, 2012 (GLOBE NEWSWIRE) -- Kratos Defense & Security Solutions, Inc. (Nasdaq:KTOS), a leading National Security Solutions provider, announced today that its SAT Corporation subsidiary has shipped its new SAT-DSP-6000. The SAT-DSP-6000 provides 250MHz of Instantaneous Bandwidth and an extended L-band input frequency range of 900MHz to 2450MHz, allowing for much faster measurements of entire transponders.

The need for more bandwidth is growing, driven in part by increasing use of new Ka-band satellite systems. These Ka-band systems provide transmission of carrier bandwidths exceeding 200MHz, requiring monitoring equipment that is capable of maintaining or improving existing measurement speeds. The SAT-DSP-6000, when integrated with SAT Corporation's industry-leading Monics® or SAT-DSA® carrier monitoring and interference detection software products, performs carrier-under-carrier analysis at the same levels customers have come to rely upon from SAT's existing Digital Signal Processors (DSP), including the SAT-DSP-5000, in partnership with RT Logic.

The SAT-DSP-6000 can be added into existing Monics or SAT-DSA systems alongside other SAT DSP and SAT-controlled spectrum analyzers. This alleviates the restrictions of a highly proprietary "single box" carrier monitoring system and enables customers to efficiently grow their systems as technology and business needs require.

"Introduction of the SAT-DSP-6000 maintains SAT Corporation's leading edge market and technology advantage," said Bob Potter, President of SAT Corporation. "The SAT-DSP-6000 can be added to any existing Monics system as an additional measurement chain and furthers our digital spectrum analysis capabilities to meet the growing needs of the high performance and Ka-band communities."

About Kratos Defense & Security Solutions

Kratos Defense & Security Solutions, Inc. (Nasdaq:KTOS) is a specialized National Security technology business providing mission critical products, services and solutions for United States National Security priorities. Kratos' core capabilities are sophisticated engineering, manufacturing and system integration offerings for National Security platforms and programs. Kratos' areas of expertise include Command, Control, Communications, Computing, Combat Systems, Intelligence, Surveillance and Reconnaissance (C5ISR), satellite communication systems, unmanned systems, cyber warfare, cyber security, information assurance, critical infrastructure security and weapons systems sustainment. Kratos has primarily an engineering and technical oriented work force of approximately 4,000, many of whom hold an active National Security clearance, including Secret, Top Secret and higher. The vast majority of Kratos' work is performed on a military base, in a secure facility or at a critical infrastructure location. Kratos' primary end customers are United States Federal Government agencies, including the Department of Defense, classified agencies, intelligence agencies and Homeland Security related agencies. News and information are available at www.KratosDefense.com.
